Health and Safety remains the number one value for Doosan Babcock and we believe that every job can be done safely.

Industry Recognition
We have held BS OHSAS 18001 Occupational Health & Safety Management Systems Certification for over 15 years and strive for Continual Improvement year on year.

During 2016 we saw the number of accidents reduce by 15% across the whole business and 2016 accident frequency rates also improving from 2015 as follows:

- AIFR – reduction from 0.03 to 0.01
- RIFR – reduction from 0.33 to 0.25
- TIFR – reduction from 1.32 to 1.29

We had outstanding Health and Safety Industry Recognition by winning several prestigious awards including the British Safety Council Sword of Honour Awards at Stanlow Oil Refinery and Heysham 1 Nuclear Power Station, as well as the Engineering Construction Industry Association RISE Award for promoting best practice health and safety standards. This Safety Excellence Award was related to Doosan Babcock's Corporate Social Responsibility Programme where each project was driven by Safety Excellence and Doosan's proud vision to improve the quality of life for the people and communities we serve.

Fifteen Years of Outstanding Safety at Grangemouth
Further success was seen at the Grangemouth Oil Refinery and chemicals complex where our team surpassed a staggering 11,000,000 man hours since their last lost time incident (LTI) in 2001. This equates to more than 5,500 days of continuous, safe working across a highly safety-sensitive working environment, incorporating year-round maintenance, turnarounds, construction, EPC projects and specialist technology services.

Contract Manager, Drew Halley, said: “This is a real milestone for our team at Grangemouth and proof of their on-going commitment to ensuring the safest possible working environment in what is a very high-pressure environment. I am hugely proud of the team’s performance and encourage all the guys on site to continue raising the bar in safety excellence.”

Dave Cornforth, Director – MRO, Doosan Babcock, said: “What an achievement! That’s 15 years of complex lifts, working at heights, and confined entry events all carried out to the very highest safety standards. The collective commitment of our local leadership and the team on site not only serves to reinforce Doosan Babcock’s reputation for predictable safe delivery with our customers, it is also, more importantly, ensures that our people go home safe and sound to their families at the end of every day. Well done and thank you to everyone who has contributed to this exceptional safety record over the past one-and-half decades.”

Thank You Campaign
A Focus2Zero Awareness Campaign was launched in 2016 called ‘Thank You for Staying Safe’ to reinforce our Safety message and engage hearts and minds. The Campaign focuses on Doosan Babcock and friends/families saying thank you to our employees for returning home safe at the end of each working shift.

Through this Campaign we had a Companywide Stand Down for our personnel on 22/08/16 where a video by our executive leadership who reinforced our Standards and Expectations.

Hand and Finger Safety Campaign
As part of this awareness and our commitment to continual improvement Doosan Babcock developed a Hand and Finger Safety Campaign to heighten awareness of the hazards and the controls, this centered around monthly briefings delivered by line managers/supervisors, posters focusing on some of the most debilitating injuries and “Your Hands at Work” booklet which was designed and distributed across the workforce.

“We had outstanding Health and Safety Industry Recognition by winning several prestigious awards”

“Push and Pull Sticks” for lifting operations were also introduced allowing focus on keeping the upper limbs away from the line of fire. This control measure was successfully trialed at one of Doosan Babcock customer sites and a video was made to allow full demonstration of how the sticks are used. This has now been successfully introduced across many of our other sites and should lead to a reduction in hand and finger injuries.
Let’s achieve a safer, zero harm workplace together

Standards and Expectations

We guarantee that:

- Risks will always be properly addressed
- All tasks will be planned, clearly briefed and understood
- All health and safety concerns will be taken seriously
- Managers and Supervisors will provide visible leadership

We ask that you always:

- Report fit for work
- All tasks will be planned, clearly briefed and understood
- Have a questioning attitude
- Managers and Supervisors will provide visible leadership
